---

i have ssgm installed i used the full installer of brenbot when i load the server nothing happens with ssgm, now will it install a new copy over my alrdy congif copy? is so i will reconfig it.

i think i figured out my ftp problem i will check it out in a bit when i can get on my user account. Ok i have the plugins working now my other thing is if i can't figure it out how do i get the uploaded files as html and not txt?

Ok so i got ssgm to work it installed a new copy of it over my copy.

How would i shut off Renguard all the way so it don't nag people about not having it?
