Hey all we now have a bot (written by Buzzer) relaying ingame chat to our irc channel.
There are currently two commands you can use:

!pl - to show who are in the server, playerlist
!msg - to send a msg into the server to talk with players

To join come to irc.mp-gaming.com in channel #mp-renx
Voice +v is required to !msg into game so be patient for a moderator to give you voice status

PS: This bot written in PHP will be available for server owners on
http://renegadex.game-maps.net when it is finished.
