I know, sorry for the double post. I'm still learning how to navigate this site. I tried what you said, but I am still having some problems. Like mow when I start my game it ask for the disc and it never did that before. So far most of the problems are small and I can still play my game... so I guess I'll just give up for now on the skins and other stuff until I can afford to buy the game again. Thanks for the help!
