Hmmm... still can't get it to work.

But does anyone know this? I want to check the current character a player has. I thought something like this:

```
if (obj = "CnC_Nod_Minigunner_0") {  
...  
}
```

Are there a site with all the functions/methods like Get_Player_ID, Get_Player_Name, Get_Player_Name_By_ID etc etc... ?
