I'd suggest looking on newegg.com for a case as well. Tigerdirects prices are a little..um..high. Take for instance this chieftec case newegg has for sale, even comes with a ps, only \$89.99 (US dollars)

Heres what it looks like

Hopefully the links work but if not go to newegg.com and the chassis should be on the main page. I recommend newegg the prices are good and they get your stuff to you quicker than most other places ive used. Just my two cents.
