Rene-Buddy (Renegade Buddy)

Devolopment On hold till the WOL Protocol stop changing. (probably after the release of scripts 4.0)

A XWIS instant messenger for C&C Renegade developed by halo2pac.

Allows you to talk to Renegade players and maintain a list of buddies without the need for the game its self.

A few features added with this program include and are not limited to:

Smooth streamline user interaction.

Enhanced buddy tracking.

Buddy list size enlargement.

Enhanced stats for the server your buddy is playing in. (Coming soon)

Buddy status alerts. (logoff, logon, join)

Nickname registering/deleting. (coming soon)

Easier user blocking.

Server Listings.

Password Resetting

Join buddy in game from Rene-Buddy. (coming soon)

Clarification:

Any user logged in with Rene-Buddy will appear as an idle Renegade Player in the Xwis-Renegade lobby.

Also Rene-Buddy has been approved by Dave Anderson from DCOM Productions Dave Anderson wrote on Wed, 28 October 2009 10:42This program is safe. I have personally went through each source file and checked the source for malicious code. There is none. If you don't feel you trust this program, there's no hard feelings; just don't use it. However, if you like the features it has to provide, then that's great too.

Thanks Dave <3

And

Dante

Dante wrote on Sat, 03 April 2010 17:05Just went through the code myself, looks safe.

(Thanks for the sticky Gozy <3)
