i would of guess how it caused

it caused it because i was playing tiberium wars for like 4 hours and the game crashed saying  
' FATAL EXCPETION '

0x0000000000064

0x000000000453

0x000000454(AT\_BASE)

due to the severity of the game it will close

thats the game error

the BSoD it said something about OUT\_OF\_MEMORY at kernal

thats all i can remember
