post the links to some free (freeware) usefull tools/progs for windows. (I use windows xp)

<http://www.ccleaner.com/>

CCleaner is a freeware system optimization, privacy and cleaning tool. It removes unused files from your system - allowing Windows to run faster and freeing up valuable hard disk space. It also cleans traces of your online activities such as your Internet history. Additionally it contains a fully featured registry cleaner. But the best part is that it's fast (normally taking less than a second to run) and contains NO Spyware or Adware!

Free YouTube to MP3 Converter. Extract and download music from YouTube movies and save it as MP3 files on your PC with one mouse click. Download both single videos and complete playlists and user's channels. (this prog takes only the soundtrack, not the whole video-clip)
