KTB wrote on Fri, 06 November 2009 16:31I got TFD and the only shaders are of the scripts... so that cant be the thing right???!!!

Okay, Put your disk in, Click on the TFD Launcher, Click on Add/Remove, Then click on "Repair", And let it work. Once that is done, Reinstall Scripts 3.4.4. And if you have ret per weapon, Etc, Reinstall that.

And if your Renegade still isn't working tell me.
