I had only heard of the one for male (s_a_human) and one for female (s_b_human)... but now that I take a second look into my mixer I see 2 more s_c_human and s_z_human.

Anyone know more about what the others are for?

In the mean time I will try to export using the others including the female one just to see what happens.

Edit: lols, this what happen with s_z_human

wtf
