Caveman wrote on Mon, 07 December 2009 08:12 For someone to actually get through your routers firewall would have to know what they were doing... Them people dont spend there time hacking into random people computers.. You have nothing to worry about from 'script kiddies' that think they're hackers because they downloaded a 'hacking' program.

lol ya i have a friend who goes to these major conventions for hackers and he tells me how he knows how to hack and has a firewall better than anyone else the FBI called him up asking him about why its so strong, and how he hacked its friends pc and can see everything they are doing.....sometimes I wonder if its true or not
