Them people dont spend there time hacking into random people computers.. You have nothing to worry about from 'script kiddies' that think they're hackers because they downloaded a 'hacking' program. lol ya i have a friend who goes to these major conventions for hackers and he tells me how he knows how to hack and has a firewall better than anyone else the FBI called him up asking him about why its so strong, and how he hacked its friends pc and can see everything they are doing.....sometimes I wonder if its true or not

I've 'hacked' someone computer where I could see what they were doing, take control of there computer and what not. Thats not hacking. That was just me abusing Windows ME and getting someone to install a program that opened ports for me. A good anti virus (should) stop you from downloading such virus'. Someone who has the skills to actually hack someones computer doesn't go around boasting about it. These people stay hidden.
lolWindowsME

lol, seconded.

All this begs the question though, what exactly do you have to hide, SSnipe?

besides embarrassing photos of the family and everything since birth,

nothing really
