Ok so on nr i have a command that is !Own name and when i use it on islands it moves me to the field, but when i mod island and then put it on the server and when i use the command i get stuck in a rock, i have placed the renegade spawner and the commando start spawner and still get put in a rock??????

i put island in, le and i see nothing diff about it then mine besides the fact that the westwood version is all set up and mine is not, just has spawners.

i'm trying to make a free for all sniping server so you have no back up.
