this has come as a big shock to me because The makers of Counter Strike have not shut down sites distributing aimbots. If anyone has any more information about this POST.

Story:

I was surfing the web looking for aimbots for Counter-Strike and I come across a site advertising an aimbot NO JOKE!. But just as im about to down load it my parents tell me we have to leave. So i book mark the site and come back the next day. Guess what the site is now a direct link to <http://www.ea.com>. Creepy how did they find and cofiscate the site so fast weird.
