DarkDeminthis has come as a big shock to me because The makers of Counter Strike have not shut down sites distributing aimbots. If anyone has any more information about this POST.

Story:

I was surfing the web looking for aimbots for Counter-Strike and I come across a site advertising an aimbot NO JOKE!. But just as im about to down load it my parents tell me we have to leave. So i book mark the site and come back the next day. Guess what the site is now a direct link to <http://www.ea.com>. Creepy how did they find and cofiscate the site so fast weird. You suck you fag everyone owns you at CounterStrike and you can go suck dick. Just to let you know, almost every one of those hacks has a trojan of some sort on it that can allow it's creator to control your computer and steal your bandwidth. Haha, you deserve it, fag.
