The 5850 and 5870 are out now. Ditto for the 5770. The 5830 is supposed to be out like, a week ago but I've no idea what the deal is.

nVidia is debuting their new series of cards sometime soon, so when the time comes, ATI will likely drop their prices a bit. You should have quite a few options from either nVidia or ATI.

Don't discount the Intel route, because I've looked up some benchmarks, and it seems the 'slower' i5-750 outpaces the 965 in quite a few applications. Your best bet is to just find the best deal, because really, you can't go wrong with either brand.
