Ok, I noticed something about northbridges and southbridges. I also noticed that the ASUS P7P55D PRO does not have a southbridge. If I got my facts right, that means I have no connectivity to the HDD. So, the MSI 790FX-GD70 looks to be the better choice, correct? Plus, the MSI 790FX-GD70 seems to have more features, so should I go with that one?
