C&C Tiberian Sun is now available for download directly from the EA website! I'm not sure if there are a lot of people here that like TS, but I know I do

Watch out with installing Westwood internet components though, as when you install the TS internet components over your Renegade ones, Renegade won't work online anymore.

<http://www.commandandconquer.com/classic>

Edit:

I wonder if and when they'll release C&C Renegade to the public
