According to the IRC RFC1459 it doesnt for the command JOIN, unless you use the nick first (see last option in quote).

According to that the join command is written as:

Quote:JOIN #foobar ; join channel #foobar.

JOIN &foo fubar ; join channel &foo using key "fubar".

JOIN #foo,&bar fubar ; join channel #foo using key "fubar"
and &bar using no key.

JOIN #foo,#bar fubar,foobar ; join channel #foo using key "fubar".
and channel #bar using key "foobar".

JOIN #foo,#bar ; join channels #foo and #bar.

:WiZ JOIN #Twilight_zone ; JOIN message from WiZ

I'll update my post if it did work but i doubt it.

EDIT/UPDATE: Doesnt changes athing for me. Reborn??

EDIT2: I just found out that the last option is received by all persons on the channel. It's not a way to join a channel. Using ':' in a JOIN is there for wrong for certain
