one thing I personnaly would change is putting the mammys backlight on side fenders and not on the engievent

Lol, I agree now that you mention it.

I no longer have photoshop to change it now as it's been a while since I made this.

Edit:

Actually now I remeber , I was going to put them on the side fenders but the lights will also appear on the front of the Mammy since the texture is used multiple times on different parts of the Mammy model.
