Why not just log the kid onto the guest user account so he cant screw anything up?

Anyway, as for the question, why not just use the built in 'Export Bookmarks' function to create a backup of your bookmarks which you can restore if he deletes any?

http://www.killertechtips.com/2009/06/02/backup-chrome-bookmarks/

EDIT: And, in case your wondering, I don't use Chrome, however I was able to find the answer to your question using this magical thing called Google. You should try it sometime.
