Out of fucking nowhere comes another public test of Rp2! With all new weapons, vehicles, and areas to explore! We want you to play our unbelievably awesome mod and report any bugs you might encounter so that they might be fixed for the full, final version.
Our official server is now up and ready, come try it out. You will need to have the most recent version to play on the server, of course.

Please download any updates posted below after you install the map.
