Well the biggest problem for visibility I think is not that the vis is undouable but that the city you are building is in continue development.

Agreed even so if you are in the visstate you would probably need two full weeks of proccessing time. (If LE can survive that time)

Field total vis proccessing took 4 min on my laptop which is a 1,6ghz 512mb. (granularity of 8 sample size 20 meters)

Please don't blame me for trying to understand it.
