umad Trojan?

I know both sides of the story, believe it or not, and i don't even talk to xpert, so go assume shit elsewhere. It's also Stewie's new mod, and it is a great mod, which had a lot of time and work put into it. You clearly are still pissed that Xpert denied you - in your attempt to buy Atomix - and was then banned from the community all together. You are taking this personally obviously, which i really don't think is necessary....Xpert is doing what is best for Atomix, as he views it, and i'd have to say that for the most part, i agree with him.

Oh, that's a reason to hate someone. Seriously, stfu.

Quote:piece of shit that hacks peoples facebook and emails because the said person posted a picture of xpert on the forums.

You clearly don't know Anthrax very well, and have only heard his side of the story. Be a hypocrite more please?

Atomix was just as alive today as it was yesterday. Most of the mods that were demodded rarely even played anymore. If they want to leave a community just because they were demodded, then i'd rather not have them there in the first place.

I've never had a problem with you before volcom, and you have never had a problem with me, so i see no reason to go and get all pissed at me because i like Atomix, and support Xpert. How about you calm the fuck down before embarrassing yourself further?

Thanks.
