DarkDeminthis has come as a big shock to me because The makers of Counter Strike have not shut down sites distributing aimbots. If anyone has any more information about this POST.

Story:

I was surfing the web looking for aimbots for Counter-Strike and I come across a site advertising an aimbot NO JOKE!. But just as im about to down load it my parents tell me we have to leave. So i book mark the site and come back the next day. Guess what the site is now a direct link to <http://www.ea.com>. Creepy how did they find and cofiscate the site so fast weird.

There may have been Aimbot's for counter stike once but Renegade only has the click bot which sucks and does not give you even the slightest advantage at all...

Focus less on searchng for aimbots and more on getting the true aimbot SKILL!!!.
