Your signature is effectively still too big. Please make it so your entire signature fits in the space currently used by your image.

Quote:Signatures: These should be nothing more than a small image and few lines of text. Once signatures start getting larger than 8-10 lines of text in size (approximately 450 pixels ACROSS * 150 pixels DOWN), it distracts from the actual post. The purpose of a forum is to read what other people have to say, not to look at the "pretty pictures" in their signature. The file size of signature should also not exceed 512Kb. If you think that this is too large, you can choose to hide signatures in the Control Panel. Administrators and Moderators reserve the right to restrict your access to the "signatures" feature if you abuse the privilege by using it to violate any of the forum rules.
