Level edit is not very hard to use. There is no need to pay for renegade maps. Also the activity of our servers really have no reflection on the community. We have a player base of over 100 in 2 weeks. Our server mod is not fully up is we our public aow does not have people in it. So nice try bro. Also the registering of names matters? LOL. Go unregister them. Its not going to cause your server to crash..
