Drop your Iphone from 3' onto concrete.

If it still works, I'll withdraw my comments.

Not exactly my iPhone, but my brothers 3G iPhone slid into the bath while he was in it. He told me the story while i was syncing music onto the device days after it happened.

My 3G iPhone has dropped from my pocket height onto concrete, and yes a crack from one side to the other has occured, it's been like that for nearly a year and a half now (September 08) and has worked perfectly since.
