You could also try to set the affinity to 1 core.

While game is running:

1. Open TaskManager
 2. Go to 'Processes' tab
 3. Find 'Game.exe'
 4. Right-mouse on 'Game.exe'
 5. Choose 'Set Affinity...'
 6. Remove all checks from the checkboxes, except 1 (so only CPU0 is checked or only CPU1 etc)
 7. Click 'OK'
 8. Close TaskManager
 9. Go back into renegade
 10. Hope its fixed
