The issue you're describing needs to be looked at (I'm not quite sure, but I think it will finish downloading and then notice another map was started and start downloading that one, which would lag at most one game behind. But again: not sure.)
This is going to take a while to fix isn't it lol, because I just made that up off the top of my head, as far as I know it won't be an issue at all, so there is probably 1000x more real issues to go. Ah well, we shall wait XD
