there are already beta testers. There is a long list of people that have been beta testers for years. They are the ones that get to test it.

It would be nice to make a open beta so the stuff already made can be tested extensively. Not sure if it is at the point or not.

Most of people getting scripts 4.0 are getting it from apb. This leak shouldn't be a big deal. Then again I have no idea whats actually going on.
