Cheats are cheats. But HUDs aren't one of them.

(upgraded?) HUDs are indirect advantages. Cheats are direct advantages.

Basically, a HUD gives you some information but still requires you to compute it into your strategy for playing. A cheat just makes the game easier to play in direct advantage to everyone else (big heads, infinite health, stealth detection, ect.)

Whether or not an (upgraded?) HUD is bad or not is up to you. But they should in no way measure up to ACTUAL cheats.
