So if a feature is available in the game I can use it.  
Meaning that it was intended to be used?

Toggle Spoiler

According to this picture I can modify anything to my specifications? (maps,chars,weapons)

So in your terms it is a feature.  
To use the 'flaw' as in the picture does not say I should or can use it online.  
Yet it's a feature in the game to modify anything to my own specifications?

Yet that is where I fill in the 'feature' argument.  
Wouldn't it be fitting to give havoc a big hat on his head?

What I'm aiming at is that sure you can describe the BB not as a cheat.  
Yet if that has any possibilities in making any other 'cheats' just advantages then there is something wrong with your criterion.  
You see my argument to use havoc with a big hat and your argument make no sence.

Its hard to describe a line so lets run pure servers!  
Or at least get one central rule.
