That would be because it's about the only cheat that people try to post here. Let's also not forget that GoodOnedriver got a permanent ban for posting Nuke and Ion Emitters (although he was indeed a recidivist).

Lmao, a perm ban for a player who had no clue wtf he did, a 30 days ban for a HUD with bb's (Let's not forget, scripts makes it possible for everyone to create stuff like that.) and a big "hello welcome to the Renegade Public Forums" to the asshole who killed for hundrets of players the fun for the game because you can't trust anyone anymore.

Kinda pervy.
