I downloaded the final-renegade thing just to see what it was like (i have not and will never cheat in an online game, now against a AI, well, can ou say GOD MODE in DOOM :0). The big head and damage hacks are gay as \*&(\*!!!! But the file that modifies how the sniper sees thru the scope is something that I actually like, although it makes me kinda motion sick and I tend to forget that I am in that mode and wonder why I am moving so slowly and next thing I know my brains are scattered on the wall behind me.

Is this a cheat or just a modification? It does nothing to help aid ur aim or fire the trigger.

:rolleyes: :rolleyes:
