DragonFgMaybe all of you laready know but i've been in a game with cheater the past 2 days and the two kinds i have noticed are these: When the host can kill players anywhere anytime, and when their guns auto-aim and have great power (i mean like GDI soldier blowing a harvester in 2 seconds) All I have to say to the cheaters is...come on get a life it cant even be any fun cheating

Yea we all know about these,
due to the fact that people have been announcing where to get the cheats from in servers.
