If it came out 7 years ago... and it was announced, released, and hyped.... all done with by 6 and a half years ago... just doesn't make sense...

unless this is an update?

This is just to remind you that reborn is just the same vaporware it was seven years ago, despite all the hype it's gotten between then and now.

Really, it wouldn't be so bad if the developers just admitted it and said "Yeah, we've got our thumbs in our asses and aren't really doing much else" or said "Yeah, we're too busy doing important real-life things like snorting coke. We can't be bothered to work on that shitty mod". What makes them targets for this kind of ridicule is that they pretend like the release is just around the corner.

At least when Blizzard releases things Soon™, they actually deliver eventually, and it's actually well worth the wait.
