---

After going to westwood Online/Advanced game listings. my screen tries to connect to server but before I even enter account/password. it doesn't give me a window to enter the account/password. I played before I know how it works. I went to My info toolbar "Manage Accounts" and get "Page failed to load" error. Also everything is disabled in myinfo except connectivity.

Any ideas?

Can this be happening because Xwis is temporarily down for ip/server move?

Or can I be missing something from just reinstalling after a long time...

Thank you for everyone's help in advanced.

Also if I try to connect without logging in I get operation timed out
