---

Are those nicks lost for ever?

And when I use that control panel it looks like it only controls the other games besides ren.

EDIT:

Ok, after u add a serial the "RG" option appears. (I had to grow 2 more balls just to get up to typing in one of my precious serials.)

and the nicks aren't lost forever... since now I own one of the a00000000 (high level) hostnames thanks xwis .. i was hoping for a000 but its taken.

and how safe is the control panel? can people hack in?

who is incharge?... and can he/she see my passwords/serials ultimately (or possibly)?

lol and... how do I reset a passsword for a certain nick.. since the old method doesnt work? I couldn't see how.
