Now i'm a shy guy so i didnt talk in the vid but type lol

Nah seriously i tried but i kept fucking up the vid LOL...

Anyway i tried to be as clear as possible and hope it helps some people.

It explains how to write a script for a zone where a player can trigger it to do a delayed dropoff of 5 seconds.

Dont ask why it zooms in sometimes, no fkn idea why it does that lol.

Enjoy.

Greetz zunnie
