There is better comparison material available. ->

This is the flametank w3d model from the beta from Renegade alot of the files are available and you can use them to get your models to the appropriate size.

Try checking out the Renegade Beta pack ->

Besides that you need to work out something special for your game/mod.

Just recreating Renegade in tiberian dawn style might be inadequate.

Before you get there however try to reach EA.

Which as I read is harder then I expected it to be.
