Found and written by BlackIntel. Hmm, wait, where am I one of the founders off? Oh yeah, BlackIntel....

That one was fixed ages ago, true. However our "dear" 0x90 found another more advanced exploit.

There's no need for being sarcastic in any way.

<http://aluigi.altervista.org/patches.htm#bugfix>

Look for Renegade fix.

He even shows you what bits to change.

It might be the same fix or maybe a different fix.

I really don't care since this is not the most important deal of this thread.

Also your "dear" friend 0x90 will always find holes that's what he does.

You can't fix everything and also don't use this as a reason TT is late.

Since I doubt this is the reason TT takes so long.

In three years nothing serious released usually means either the project is dead or disorganised or bad PR.

I'm not saying this is the case for TT.

What it does imply is that to the common Renegades TT's status is unknown.
