Crimson wrote on Wed, 01 December 2010 08:08 Our SVN and wiki are secured well. Ironically, this happened because of a prior leak from a former team member (jnz/roshambo) and the leaked files were the ones that troopn00b got a hold of.

I think it's safe to say he will be more careful in the future.

Sounds like passing on the blame tbh, jnz DID NOT leak the source to me and I was good enough to contact TT about the leak and give jonwil the source, jonwil is to blame for the leak because he should have known better than upload something like the to publicly accessible site and not even check if it was secure or not.
