Doitle wrote on Fri, 03 December 2010 13:38I find it hard to believe Windows 7 was running on most of the plant's equipment. Nay, I find that nearly impossible to believe.

My guess is that IF they truly were running something W7'ey it was Windows Embedded Standard 7.

Windows 7 is actually better than XP when it comes to business structures on the IT department, of course, They probably use a mixture of OS's inside that top secret place but it's most certainly no surprise that they use Windows 7 there, however if they were using Vista...
