I am trying to build a list of all the major servers and communities out there that are still active.

What I have on the list so far:

n00bstories

BlackIntel

Jelly

Exodus

n00bless

SK-Gaming

L337-Snipers

unrules

st0rm gaming

exodus

atomix

mp-gaming

thekoss2 (goztow's servers)

Anyone know of any other active renegade servers or communities out there I should have on my list?
