Mark72091 wrote on Sat, 25 December 2010 23:16Hey Xiao and everyone,

I was looking through some of my old emails for something and came across a few old replies from when I left and after looking to see if xphaze still existed in any shape or form came across this post.

So... how has everyone been?

I may just have to reinstall Renegade and see if I can get back into it.

As per the site I should have a backup on a cd around here some where. It will take some digging though.

You also have a copy of the mods that you put out for download or something, right?

Sup Mark <3
