jnz wrote on Fri, 14 January 2011 15:32 Outside our universe the laws of physics we are bound to do not exist! If a cosmos really exists (which unfortunately we cannot prove) then it is totally reasonable for very strange things to happen. Such as:- an infinitely dense, infinitely hot soup of particles and energy appearing out of no where!

True. In a truly infinite universe, anything that can happen, will happen. In fact, in a truly infinite universe, anything that can happen must happen.
