there is no more ip4 address left [http://www.ghananewsagency.org/s\\_science/r\\_25155/](http://www.ghananewsagency.org/s_science/r_25155/). Get ready for ipv6 4 million address for every person in the world without subnetting. ipv6 hasn't started to really roll out yet there are some people using ipv6 addresses but not very many.
