Good advice guys, I have already ordered the one I posted above (vertex 2),

1)how ever is there anyway to run programs off a separate hdd? just in case? I know some programs will work

2)if not, then maybe I can us this as a backup harddrive for some stuff

3) or if none of the above is worth it, then ill return it but I want to see what you guys who have more experiance with this than I has to say about it
