I'm trying to make a mini map for the game, But there is one problem that I'm having and I've seen it done before by an old friend he just don't play ren anymore and hasn't been on for ages.
anyway I'm trying to make a barrel become a building. so far i have put the barrel on the map and put the building controller on it but it don't work.

So how can i turn that barrel into a building?
i have been trying a lot of stuff to get it to work i will list them now.

1. put a barrel on the map and put the building controller on it.
2. tried to put the nod mct on the barrels and put the building controller on that.
3. tried making it a veh still not working.
